DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-5, drawn to support assembly, classified in class 310, subclass.

II. Claims 5-11, drawn to a process for manufacture transformer core ,
classified in class 29, subclass 606.

III. Claim 12, drawn to a transformer, classified in class 310, subclass ***.

The inventions are distinct, each from the other because of the following reasons:

April 7, 2003 Group I is separate and distinct from Group II inasmuch as Group I can be made integrally with the metal transformer core i.e. without the "affixing" step which is required in Group II; Group I is separate and distinct from Group III inasmuch as the Group I does not need to be in a wound or laminated transformer core; Group II is separate and distinct from Group III inasmuch as Group III can be made by a materially different method than that recited in Group II

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Groups are divergent, restriction for examination purposes as indicated is proper.

Art Unit: 3729

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to C. J. Arbes whose telephone number is (703)308-1857. The examiner can normally be reached on M,T,R,F.
